

By Nagahawatta Exporteres & Importers (pvt) Ltd

Nagahawatta Exporters and Importers (Pvt) Ltd is a Sri Lankan manufacturing company established in 1998. Our company is the leading manufacturer of high-quality solid barbecue fuel from coconut shells. Our products are sold to major charcoal brands and have achieved almost cult status in places such as the United Kingdom, European Union, South Korea, USA, Japan, Australia, New Zealand, Russian Federation, and the Middle East.

We have been catering to the passion for barbecuing worldwide since 1998. Our commitment is to provide BBQ enthusiasts with premium charcoal grilling products that are eco-friendly and have minimal environmental impact.

## ALL NATURAL BLEND HELP GREAT EXPERIENCE VERY HIGH HEAT

Eco Friendly

100% Natural Ingredients

Coconut Shell BBQ Charcoal

Burn virtually smokeless and completely odorless

No spark or Flame

## Black Pearl Charcoal: The Original Coconut Charcoal Briquettes

Henry Ford created the first charcoal briquette in the 1920s with the help of Thomas Edison and E.G. Kingsford.

The Black Pearl Charcoal company was founded with help of briquetting technics from these great inventors, and with it the distinctly pastime of charcoal grilling. The Black Pearl company is proud of its Eco Friendly, 100% Natural product and takes tremendous pride in its role in creating memories of great tasting barbeque shared by friends and family. As the leading manufacturer of coconut charcoal briquettes, we make it our responsibility to expand the popularity of this fun and memorable product.

- 100% Sustainable Source
- More heat than wood charcoal briquettes
- 2 - 3 times more burn time (more than 4 hours)

Black Pearl briquettes are premium barbeque / grill briquettes made of 100% coconut shell charcoal this makes environmental footprint second to none.

## New BlackPearl Charcoal

The BlackPearl Briquette provides a major performance improvement when compared with other charcoal briquette brands. Compared with other charcoal briquette, the BlackPearl briquettes shortens the the amount of time it takes to get the briquette pile lit by 40 percent, reduces the time it takes t6he briquettes to be ready to cook on by 25 percent, and increase the amount of time you have to cook your food by 17 percent. These are significant improvements, considering other briquette already led the field in these key quality attributes.

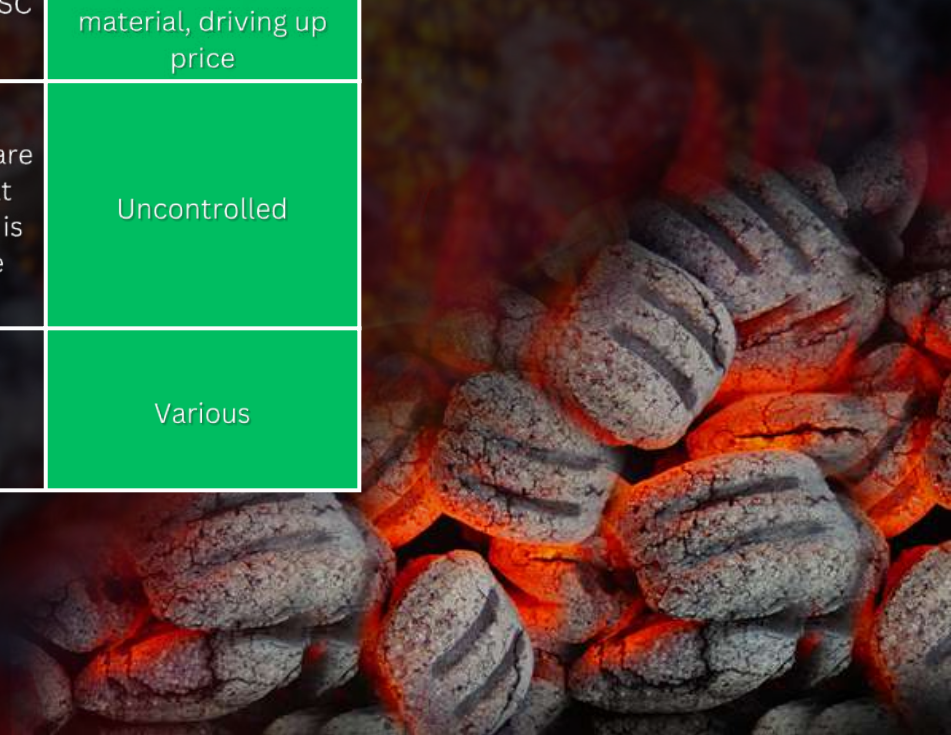

While everybody uses charcoal in their own way, the main phases a charcoal briquette experiences while burning are the same. We refer to these phases as the “Grilling Timeline”, which consists of ease of ignition, time to cooking readiness, and amount of cooking time over 200 Celsius. Our goal in producing BlackPearl Charcoal with sure fire grooves was to improve upon each phase in the grilling timeline ro provide a better experience for everyone from the casual backyard griller to the passionate low and slow barbecue competitor.

# The Green Alternative to Traditional Charcoal

	<b>Sustainable</b>	<b>Uncertainty</b>	<b>Supply base</b>
<b>Black Pearl Charcoal Coconut Based</b>	Fastest renewability 3 - 4 harvest / year Co2 - Natural Product	No trees are cut, On the contrary	Palm plantations 61M Tons of coconut p.a. are produced worldwide
<b>FSC Charcoal Briquettes</b>	Slow renewability hardwood trees take 25 - 100 years to grow. It takes 10Kg wood to 3Kg charcoal briquettes	Wide spread Concern that FSC certificates do not cover all volumes sold as FSC	Insufficient FSC certified charcoal available. FSC charcoal competes with other uses of wood like material, driving up price
<b>Non FSC Charcoal Briquettes</b>	No or dubious renewability hardwood trees take 25 - 100 years to grow. It takes 10Kg wood to 3Kg charcoal briquettes	High, producer claims that trees are replanted or that only waste wood is used can not be certified	Uncontrolled
<b>Anthracite Based Briquettes</b>	Zero	Certain	Various

## The Science Behind These Shape Improvements

The Black Pearl Charcoal company was founded with help of briquetting technics from these great inventors, and with it the distinctly pastime of charcoal grilling. The Black Pearl company is proud of its Eco Friendly, 100% Natural product and takes tremendous pride in its role in creating memories of great tasting barbeque shared by friends and family. As the leading manufacturer of coconut charcoal briquettes, we make it our responsibility to expand the popularity of this fun and memorable product.

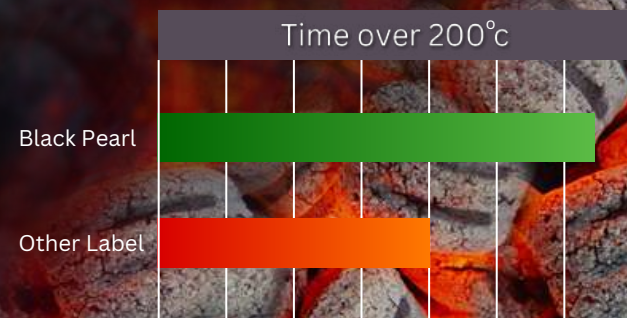

40% Improvement in Ease of Ignition

25% Improvement in time of cooking readiness

17% Improvement in time over 380°F

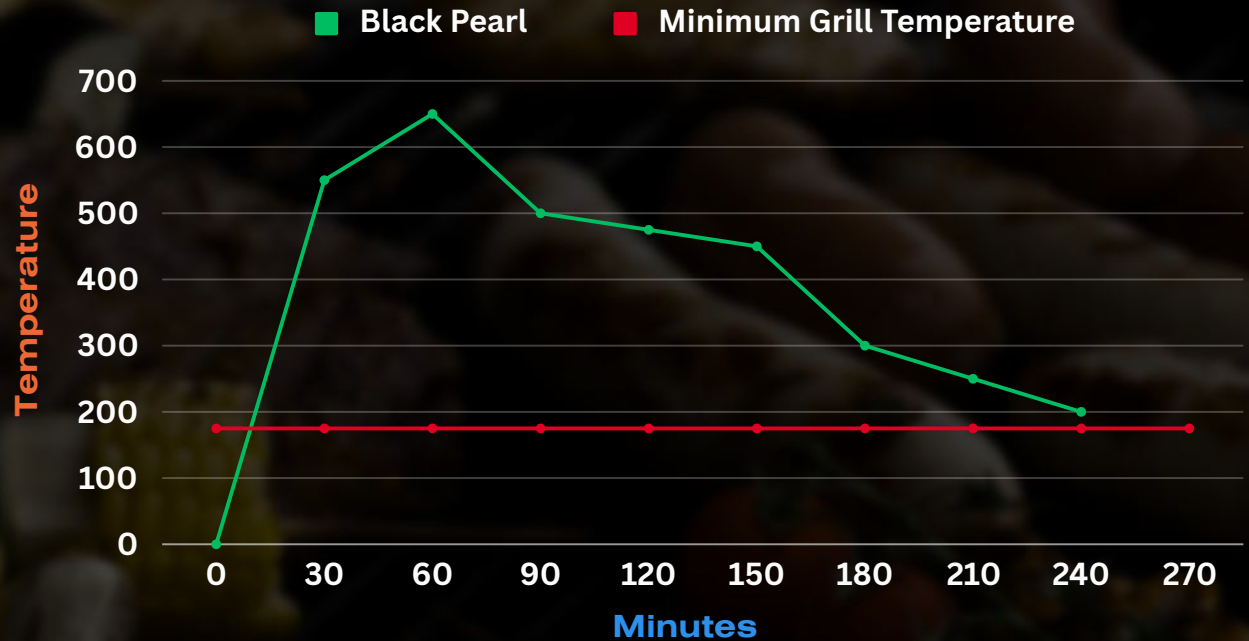

# Hotter

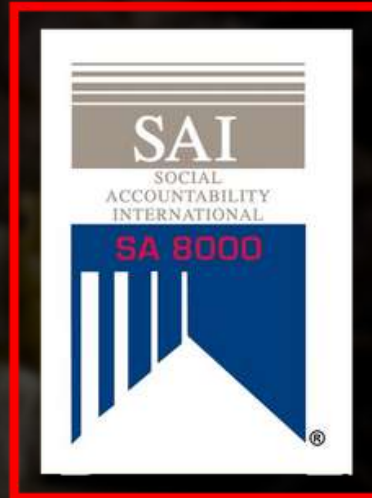

for longer

**Black Pearl** 100% natural heat pearls burn hotter for longer than any other comparable product. Intense heat without refueling for more than **4 hours.**

	Black Pearl Natural Heat Pearls	EN 1860 - 2
Fixed Carbon	75%	>60%
Humidity	5%	<8%
Ash	8%	<18%
Volatile Matter	12%	No Maximum
Crenulation 20mm - 80mm	95%	>80%
