NEXT LEVEL GRILLEN

MARABU charcoal is the Rolls Royce of charcoal types when it comes to long sessions (Low & Slow).

However, there are users who find it a disadvantage that it takes a little longer for the marabu charcoal to reach the right temperature.

Cadenko therefore introduces a beautiful blend of the combination of MARABU and SPANISH HOLM OAK, the EVEREST CHARCOAL. This holm oak lights more easily and ensures that the charcoal reaches the right temperature quickly. This, in combination with the extremely long burning time of the Marabu, makes this blend a very unique and economical charcoal with a very mild aroma and hardly any smoke. Ideal for professional ovens. Coarse sorting 25–200 mm, in a practical 12 kg bag.

NEXT LEVEL GRILLEN

Taste is personal. When preparing food, a personal touch such as salt, pepper, and spices is essential. This also applies to grilling. Some people prefer a stronger smoky flavor, while others prefer a neutral taste. PROF charcoal, a blend of the finest South African black wattle and eucalyptus wood, is a charcoal that is very practical to use. The charcoal heats up quickly, temperature is perfectly controllable, generates hardly any smoke and has a very neutral flavor. It's no wonder that PROF charcoal has been the best-selling charcoal in the gastronomy for decades.

The dimensions are approximately 40-140 mm.

THE NATURAL WAY TO IGNITE YOUR FIRE

We've partnered with the most innovative and resourceful manufacturer in the wood wool firestarter industry. By combining cutting-edge and proven production techniques, we ensure a consistently high-quality product — every time.

SUSTAINABILITY FIRST

The wood used comes from carefully managed, nearby forests. Regular thinnings help maintain forest health and biodiversity. All raw materials are certified according to PEFC and/or FSC® standards.

100% NATURAL & POWERFUL

These firestarters are made from FSC/PEFC-certified wood wool and organic wax. They ignite quickly, burn powerfully, and last long — all without chemicals, odours, or affecting taste

IDEAL FOR:

- Kamado BBQs
- Wood-fired pizza ovens
- Fireplaces
- Fire bowls

RELIABLE & SAFE

Just 1 or 2 pieces are enough.
They don't dry out, can be stored
